RT/VUE and Guardian - CDR Analytics and Protection

RouteTrust has developed the next generation reporting framework. Scales to your needs from CPS, but reports on data down to the most granular levels. Data retention is customizable as well, so pay for what you want.

Cloud Native

Scalability, Reliability, and Cost Effective with no capex

True Big Data solution

Billions of CDRs...no problem. 10000+cps, check!

Data Enrichment

LERG, Rural vs Non-Rural, Spoofing of Sensitive Number, Invalid ANIs

Machine Learning

Let our customized algorithms spot variances in your data

Fraud and Robo scoring

Advanced Algorithms to detect fraud and robo dialers.
No limits on volume

Scheduled Reports

Daily, Weekly, Monthly. Instant notifications via Text, email or notification on the portal

API Driven

Already have an intranet or customer portal? Plug us in and use the data how you want

Multiple CDR Support

Networks aren't made of just one data feed. We work with most major providers/carriers
Switch vs Rated vs Offnet

Cloud backup and Recovery

Detailed Reporting:

ASR – Per minute, destination, release code, call type, short calls and 404 management

QOS – PDD, Jitter, Packet Loss, MOS, NER

CPS – Per minute, trunk group, call type, direction: min, max, average

Port Utilization – Per minute, trunk group, call type, direction: min, max, average

Number Detail – Per minute and number, ASR and Financial Detail stats

Financial – Per minute, destination, customer and vendor, Financial Details

Regulatory and Legal Filings – Rural call completion, Subpoenas, 499s, Payphone

On-net vs. Offnet – Useful for Audit purposes. Import of vendor CDRs

Who would use this system? Let's look at the different personas
